Dear NEDAERO relation,

In this regular Newsletter we will keep you updated on our aerospace related products and service developments.

Aircraft Arresting Systems for Dutch military airbases

The contract has been signed by Colonel Spierings of the Ministry of Defence and NEDAERO's CEO mr. Kleinendorst

Ministerie van Defensie

NEDAERO has been selected by the Dutch Ministry of Defence for the delivery of the Aircraft Arresting systems (AAS) and implementation at the Dutch military airbases.

These new Aircraft Arresting Systems are the replacement of the now out-dated systems which date back to 1985. The extensive project starts this very year and will be executed in phases on the airbases Gilze-Rijen, Volkel, Woensdrecht, Leeuwarden and Eindhoven. The new system highly contributes to the safety and is fully suitable for the just implemented F-35.

NEDAERO as main contractor of the project is distributor for SAFRAN-USA, world-wide market leader and manufacturer of the new Aircraft Arresting System (AAS). This successful combination met all the requirements set by the Dutch Ministry of Defence.

NEDAERO, located in Alphen aan den Rijn and Zevenaar (both NL), produces parts for a.o. Airbus and Lockheed Martin and is specialist in components and systems for both civil and military aircraft and helicopters. The Dutch Ministry of Defence belongs, amongst many others, to the regular customer base of NEDAERO. With over 40 years of experience in the aerospace industry NEDAERO supports her clients with manufacturing, repair and distribution of components.

Honeywell repairs - pricing

Honeywell

Honeywell and NEDAERO agreed upon new 2020 pricing for repairs on selected avionics. These avionics include Gyro's, Radio Altimeters, Flight Controllers and more. NEDAERO is able to offer very competitive repair solutions for Honeywell Avionics. For more information about the applicable P/N's and repair prices, please contact repair@nedaero.com or call our Customer Support department at +31 316 592 100.

Donaldson IBF for AgustaWestland heli's

NEDAERO added another IBF line to its already broad Donaldson portfolio. These certified Rotorcraft Inlet Barrier Filter Systems are available as an AgustaWestland factory option for AW109E/S/SP, AW119 KOALA, AW119KE (P/N 119000-101), AB139 and AW139 (P/N 122000-101) Helicopters.

IBF installation requires minimal modifications and eliminates 99% of FOD, dirt, and other threats that reduce engine power and damage critical components.
