ROTORCRAFT LIQUID FILTRATION

Fly Clean. Fly Donaldson.

Filtration is our Singular Focus for the Rotorcraft Industry

When you need fuel, lube oil, or hydraulic filtration systems for new and existing engine applications, consider Donaldson as your single source. Our solutions enhance your equipment design, protect your engine components and can improve your overall aircraft maintenance experience.

- Compact & flexible solutions for Fuel, Oil & Hydraulic
- Innovation in Filtration media , Components integration, System flexibility
- Improvement in Life, System Protection, Weight and Overall Envelope

Donaldson liquid filtration ranges in complexity – from a simple t-type manifold to a complex, multiple circuit filter manifold assembly – which may include an intricate head design, multiple filter bowls, filter elements, bypass valves, shut-off valves, check valves, fluid sampling ports, and differential pressure indicators that signal when filter replacement is required.

Fuel Filtration

Rotorcraft fuel systems require more efficient fuel filtration with longer life. Learn about the features of a system and associated benefits that allow you to weigh the merits of one system's features versus another.

Lube Filtration

New engines have higher operating temperatures. This requires higher efficiency filters than in years past with the same or longer life.

Donaldson Media

Donaldson offers extensive filter media technology choices for liquid filters – over 34 different formulations. These formulations enable our engineers to develop filtration systems that exceed or meet a wide variety of customer specifications. Synthetic media captures more and smaller contaminants than cellulose media. When an application requires higher efficiency filtration than cellulose filter media can deliver, Donaldson uses synthetic media technology.

From traditional cellulose to nanofiber – the development of proprietary filtration substrates is at the heart of every Donaldson filtration system. If one of our existing media formulations does not meet our customer's specifications, our scientist use our in-house media development laboratory to develop new formulations to meet or exceed your requirements.

Hydraulics

Performance Under ANY Pressure.

We have the right filters, contamination control products and capabilities to protect your rotorcraft and components in hundreds of applications. When you need hydraulic filtration, turn to Donaldson.

- **Replacement Filters** – We offer a complete line of filters and cartridges for low, medium and high pressure applications. Each is also available in a range of media efficiencies to meet specific application requirements.
- **Assemblies** – Offering a complete line of low, medium and high-pressure assemblies for use throughout hydraulic circuits.
- **Accessories** – Accessories for hydraulic circuits, lines and reservoirs help you maintain proper ISO cleanliness levels.

Fluid Analysis

Fluid analysis is a snapshot of what's happening inside your equipment. It summarizes the condition of your oil and identifies component wear and contamination in virtually any application.

Reasons to Consider a Custom System

As you develop the future design of your engine or application, it is important to consider the filtration system.

- Looking for a system that does more; may include sensors, pumps, and/or heaters
- Interest in component/supplier consolidation – solutions that bridge a wide range of engine/aircraft
- Offering a unique solution with ease of maintenance

DONALDSON PART CROSS REFERENCE TABLE

APPLICATION	DONALDSON	ASSOCIATED PART NUMBER
FILTER		
Bell Helicopter (222 & 407)	306005	Replacement for: 222-366-621-3 Bell (222). 222-366-621-101 Bell (407) PMA Number: PQ1847NM Supplement Number: 92 Amended
FUEL FILTER		
Airbus Eurocopter France (AS-350B, AS-350B1, AS-350C, AS-350D, AS-350D1, AS-350B2, AS-350BA)	WF335192	Replacement for: 402A12-4 Alternate P-1113 PMA Number: PQ1847NM Supplement Number: 30
Bell Helicopter Textron (204B, 205A, 205A-1, 205B, 212, 412, 412EP, 412CF)	WF336347	Replacement for: 047546-02, 204-040-760-13 PMA Number: PQ1847NM Supplement Number: 57 Amended
Bell Helicopter Textron (206A, 206B, 222, 407)	KD651510	Replacement for: KD651510 PMA Number: PQ1847NM (Western) Supplement Number: 94
MD Helicopters (369D, 369E, 369FF, 500N, 600N)	KD651510	Replacement for: KD651510 PMA Number: PQ1847NM (Western) Supplement Number: 94
HYDRAULIC FILTER		
Airbus Eurocopter (AS-350B, -350B1, -350C, -350D, -350D1, -350B2, -350BA)	WF335193	Replacement for: 157152 Alternate P-1110 PMA Number: PQ1847NM Supplement Number: 28 Amended
Bell Helicopter (205A, 205A1, 212, 230, 222, 222B, 222U, 412, 412EP, 412CF)	WF35199	Replacement for: 205-076-034-3, 205-076-034-003 Alternate 7576665, AC-8993F-62 PMA Number: PQ1847NM Supplement Number: 38 Amended

Always Innovating, Always Leading

Donaldson continues to develop and certify advanced technologies and new products to serve the aerospace and defense industry. Our engine liquid filtration solutions include filter elements, assemblies and manifolds that include Delta P Indicators, Bypass Valves and Shut-Off Valves.

Our singular focus is to protect your engine.
