Dear NEDAERO relation,

In this regular Newsletter we will keep you updated on our aerospace related products and service developments.

Orolia Aviation ELT Exchange Program for Lithium Battery Compliance

Orolia, the world leader in Resilient Positioning, Navigation and Timing (PNT) solutions, has launched an exchange program for aircraft operators to meet new EASA/FAA requirements for non-rechargeable lithium batteries in portable Emergency Locator Transmitters (ELTs).

The exchange program allow operators to retrofit their existing portable ELTs (no matter what the current ELT brand is) at better conditions instead of keeping investing in battery replacement.

This portable ELT exchange program includes a variety of Ultima-S configurations that are compatible with major aircraft manufacturer programs. It is available worldwide to any aircraft operator that is still flying with a DO-227A non-compliant beacon.

Repair program for Écureuil actuators (servo's)

NEDAERO is a specialist in Écureuil helicopter parts. We are a distributor, we are a Part145 repair station and we arrange outsourced repairs.

Every Écureuil operator knows: sending your servo's back to the OEM for an overhaul, can be a time-consuming process.

The OEM's turnaround time may be up to 4 months. You do not want your helicopter grounded for the duration of this shop visit.

To solve this undesirable situation, NEDAERO has all relevant Écureuil actuators on stock. They are in OH condition, with a recent tag. They can be dispatched immediately to keep you flying.

While you are ready for your flight, NEDAERO has sent the original servo for overhaul to the OEM.

If agreed at the time of the order, your overhauled servo will be returned to you. Or, if you are happy to let go of your original unit, that unit will be kept on stock at NEDAERO in fresh overhauled condition. Usually for a very short time, because your unit is used to help the next Écureuil operator.

Examples of exchange servo's (multiple servo's in stock):

SC5083-1

Main Rotor RH servo, and
Main Rotor LH servo

SC8043

Main Rotor servo for the Écureuil Bi EC130

SC5084-1

Main Rotor forward servo (pitch)

SC5072

Tail Rotor servo

This is one way how NEDAERO saves you downtime and keeps the fun in flying!

See our Exchange pool list for more items

Contract Manufacturing

NEDAERO, a full service contract manufacturer

For years NEDAERO is known for its best in class MRO and manufacturing of avionics and electronic components.

But did you know that NEDAERO as contract manufacturer has vested partnerships and already delivers a wide range of contract manufacturing services? Amongst others we have profound test facilities and a fully automated SMD workshop for manufacturing PCB's!

With our dedicated and skilled manufacturing team we offer the entire chain of contract manufacturing to third parties, from procurement to complete assembly of electronic devices, including PCB manufacturing.

Of course we are more than interested to explore our solution to your challenge! Interested? Press the READ MORE button and check out our website.

You can also contact our Chief Of Operations, Gerrit Koene directly at gerrit.koene@nedaero.com or give him a call at +31 316 59 21 36. Also a video-call can be set up to explore the possibilities.
